New Media Design Projects

CONTEXT

An AR project to make the viewer a part of the story by creating triggers for different acts of the storyline; based on their interaction, the story progresses.

STORY ACTS & INTERACTION

We developed a single player typing game called Type of the day which is a typing game on adrenaline. The name started with was 'Type-to-win' but became 'Type of the day' because the character was going to experience an abnormal normal day.

GENRE

Adventure

TEAM

Xuyan Ding (Kevin), Le Shen, Javan Graham, Jia Zhao, Shannen Guntoro, YunTing He, Anantha Chickanayakanahalli

TOOLS USED

step in step out

TEAM

Shuting Zhou, Prayag Ichangimath, Aaditya Vaze,
Anantha Chickanayakanahalli

We created a tangible installation that changes
visualization and plays funny sounds upon
stepping on the tiles. It behaves like the Dance
Dance Revolution arcade machine.

TOOLS USED

UX Design Projects

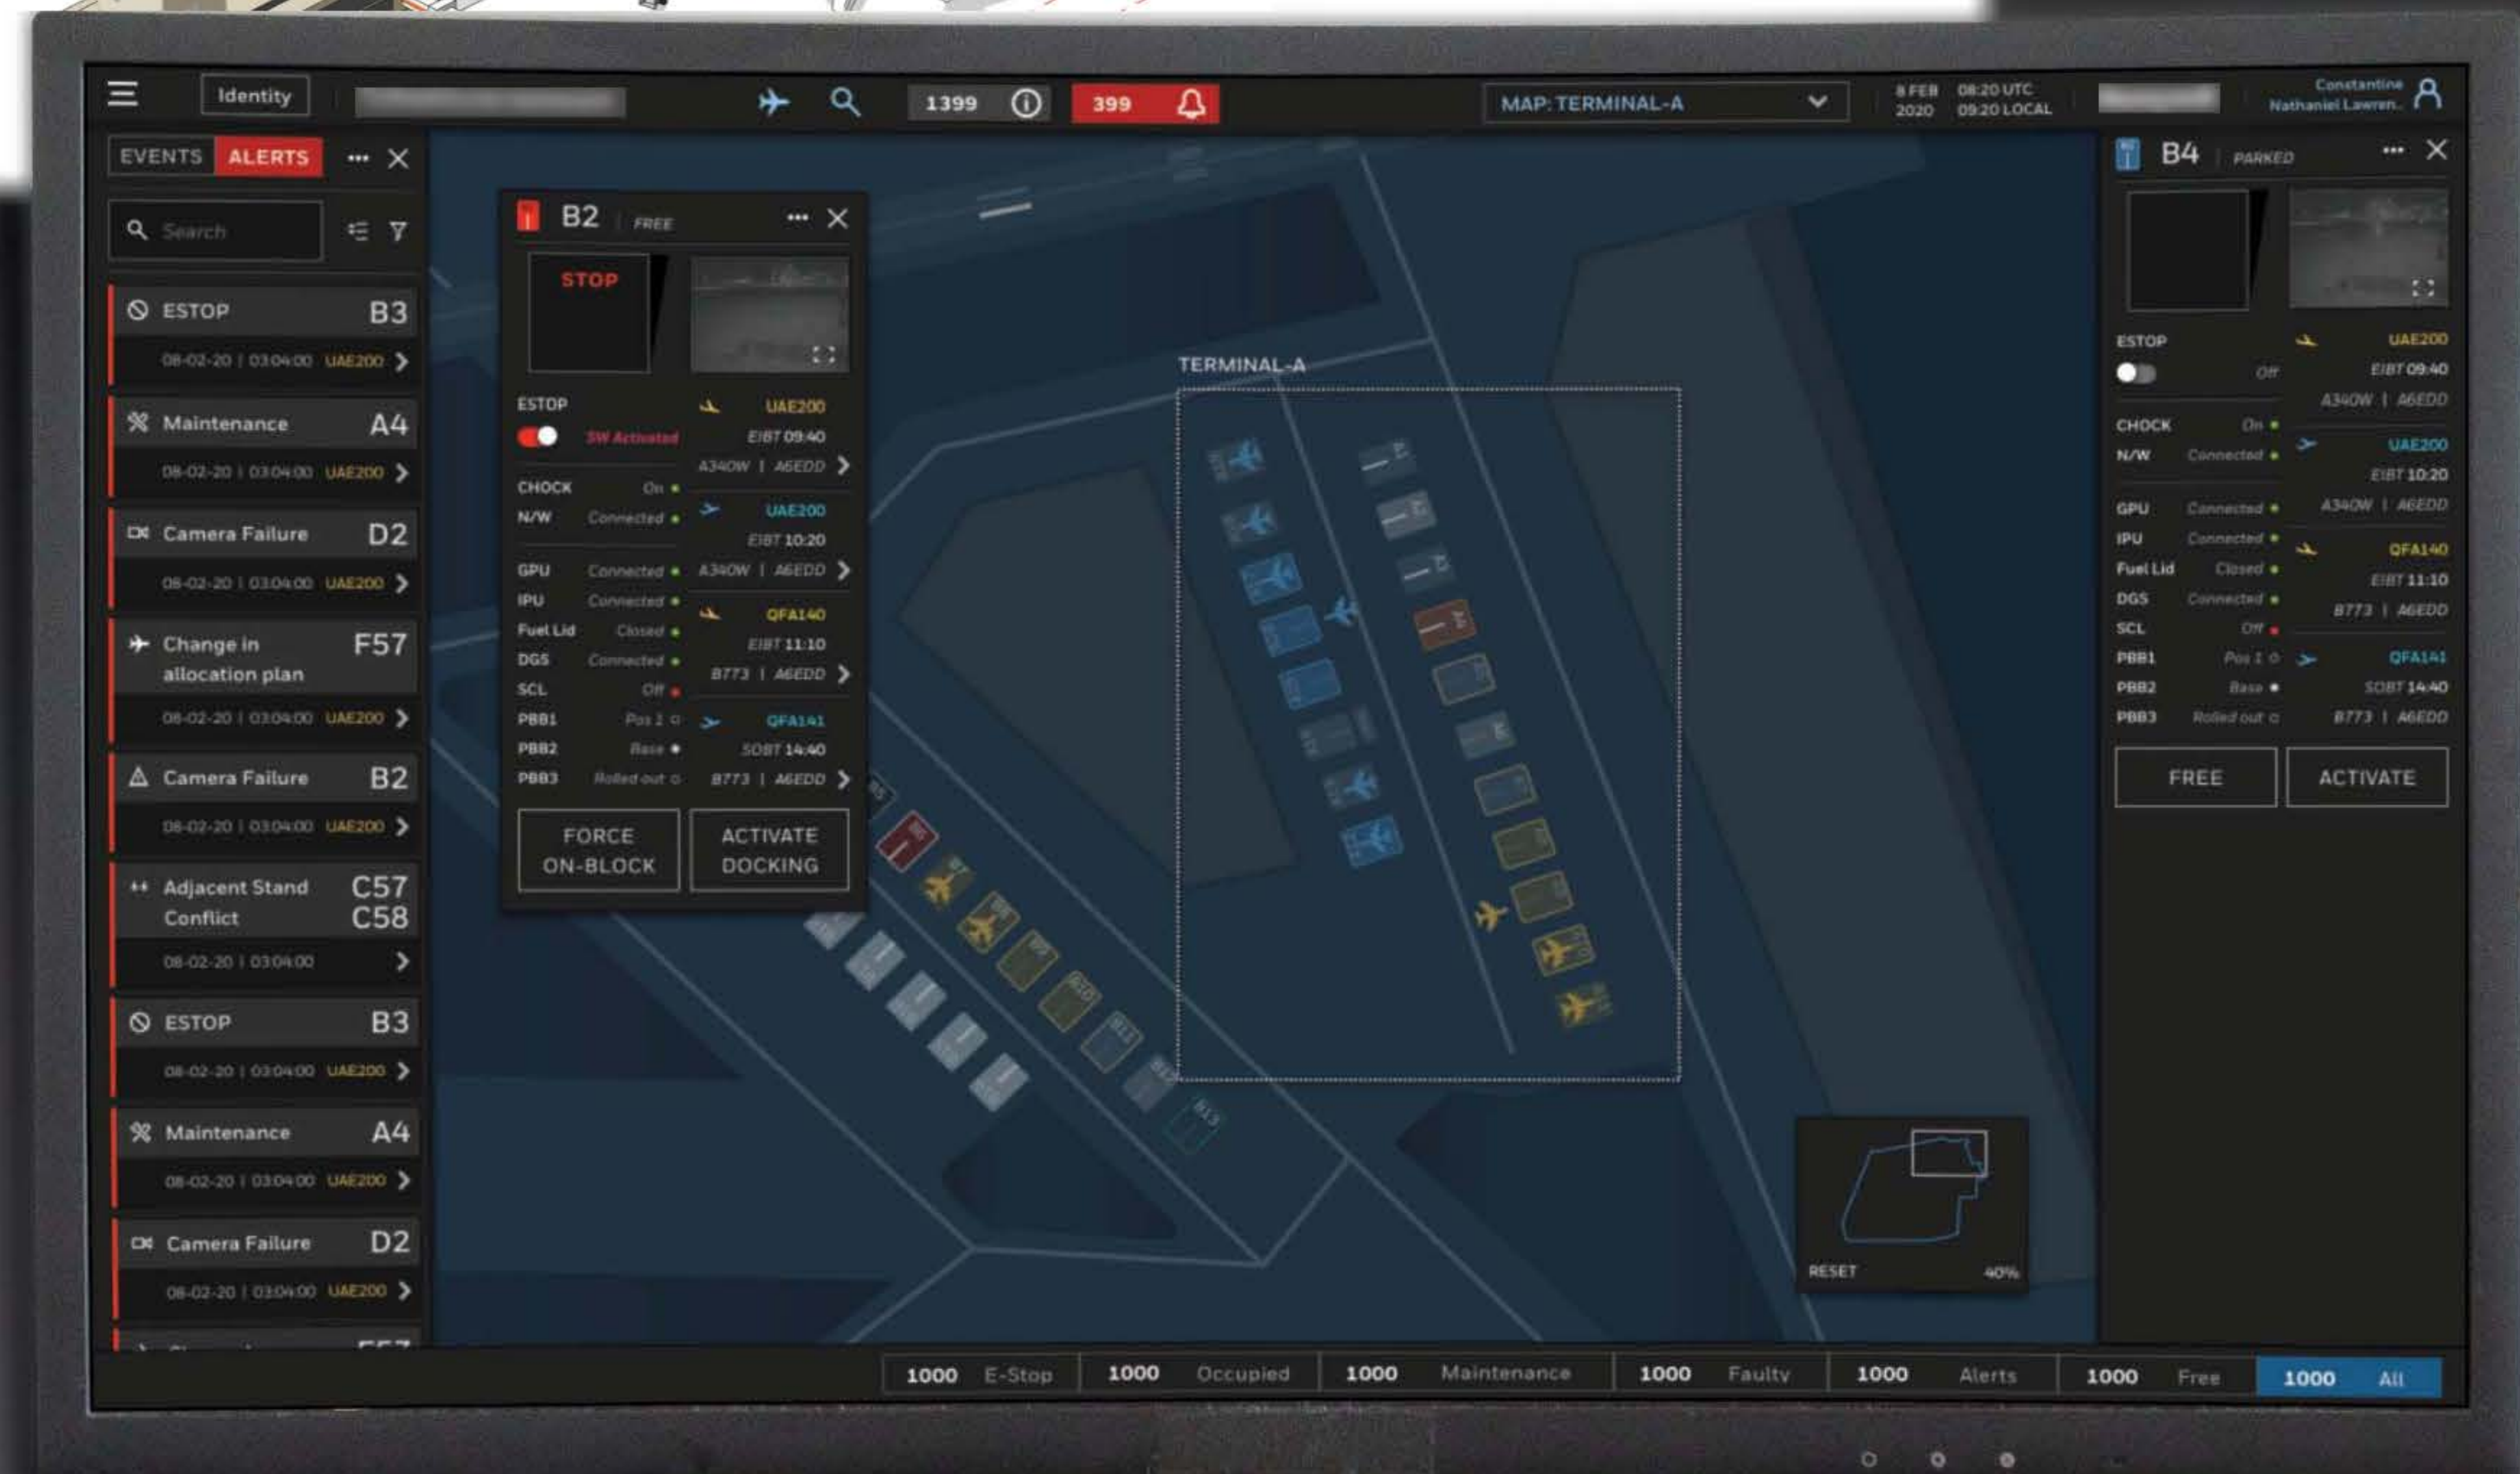

Enabling smooth turnaround of flights at airports operated by Apron Controller who manages traffic in the gates/aprons, the Gates Operating System provides alerts and controls to mitigate and tactically solve problems.

Similar to what happens at a hotel lobby - someone is waiting (some are done waiting), allocating new rooms, making a list of available rooms, taking down requirements, first best option, next best option, customer is not checking out on time (overflowing)

TOOLS USED

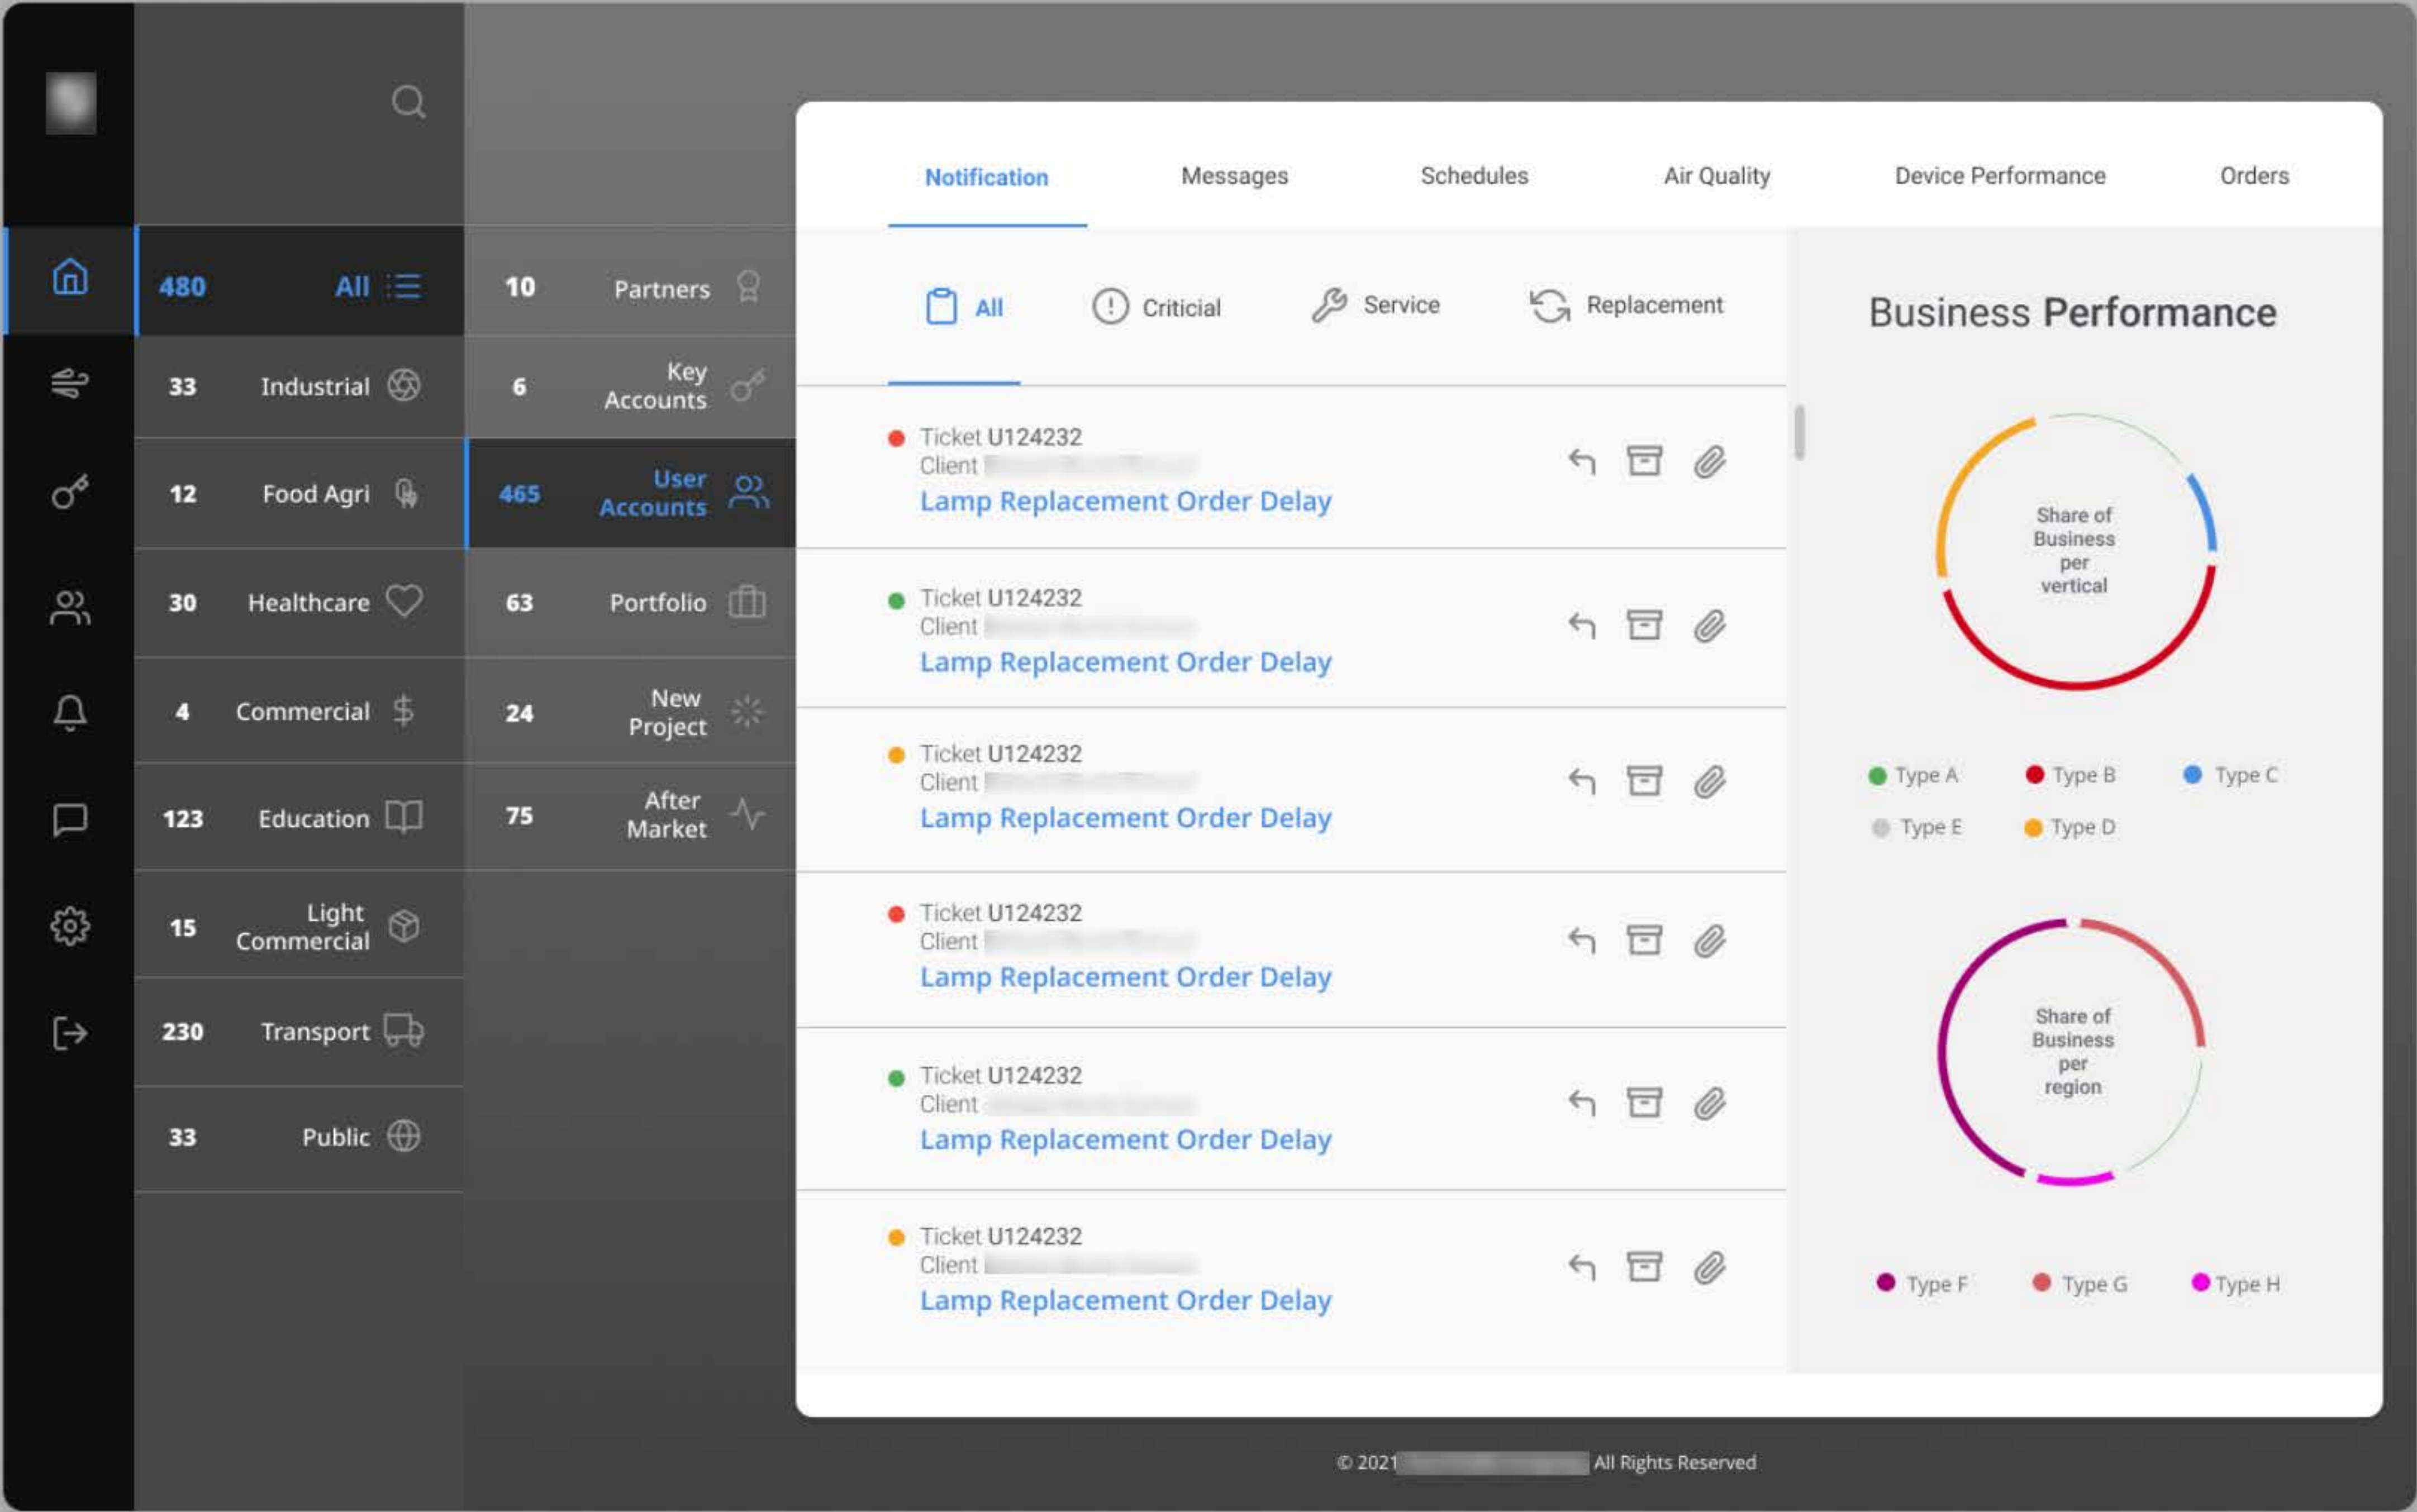

airport gates operating system

Responsive Indoor Air Quality (IAQ) monitoring master dashboard that gives different levels of information about accounts and sites to the super admin.

TOOLS USED

IAQ monitoring

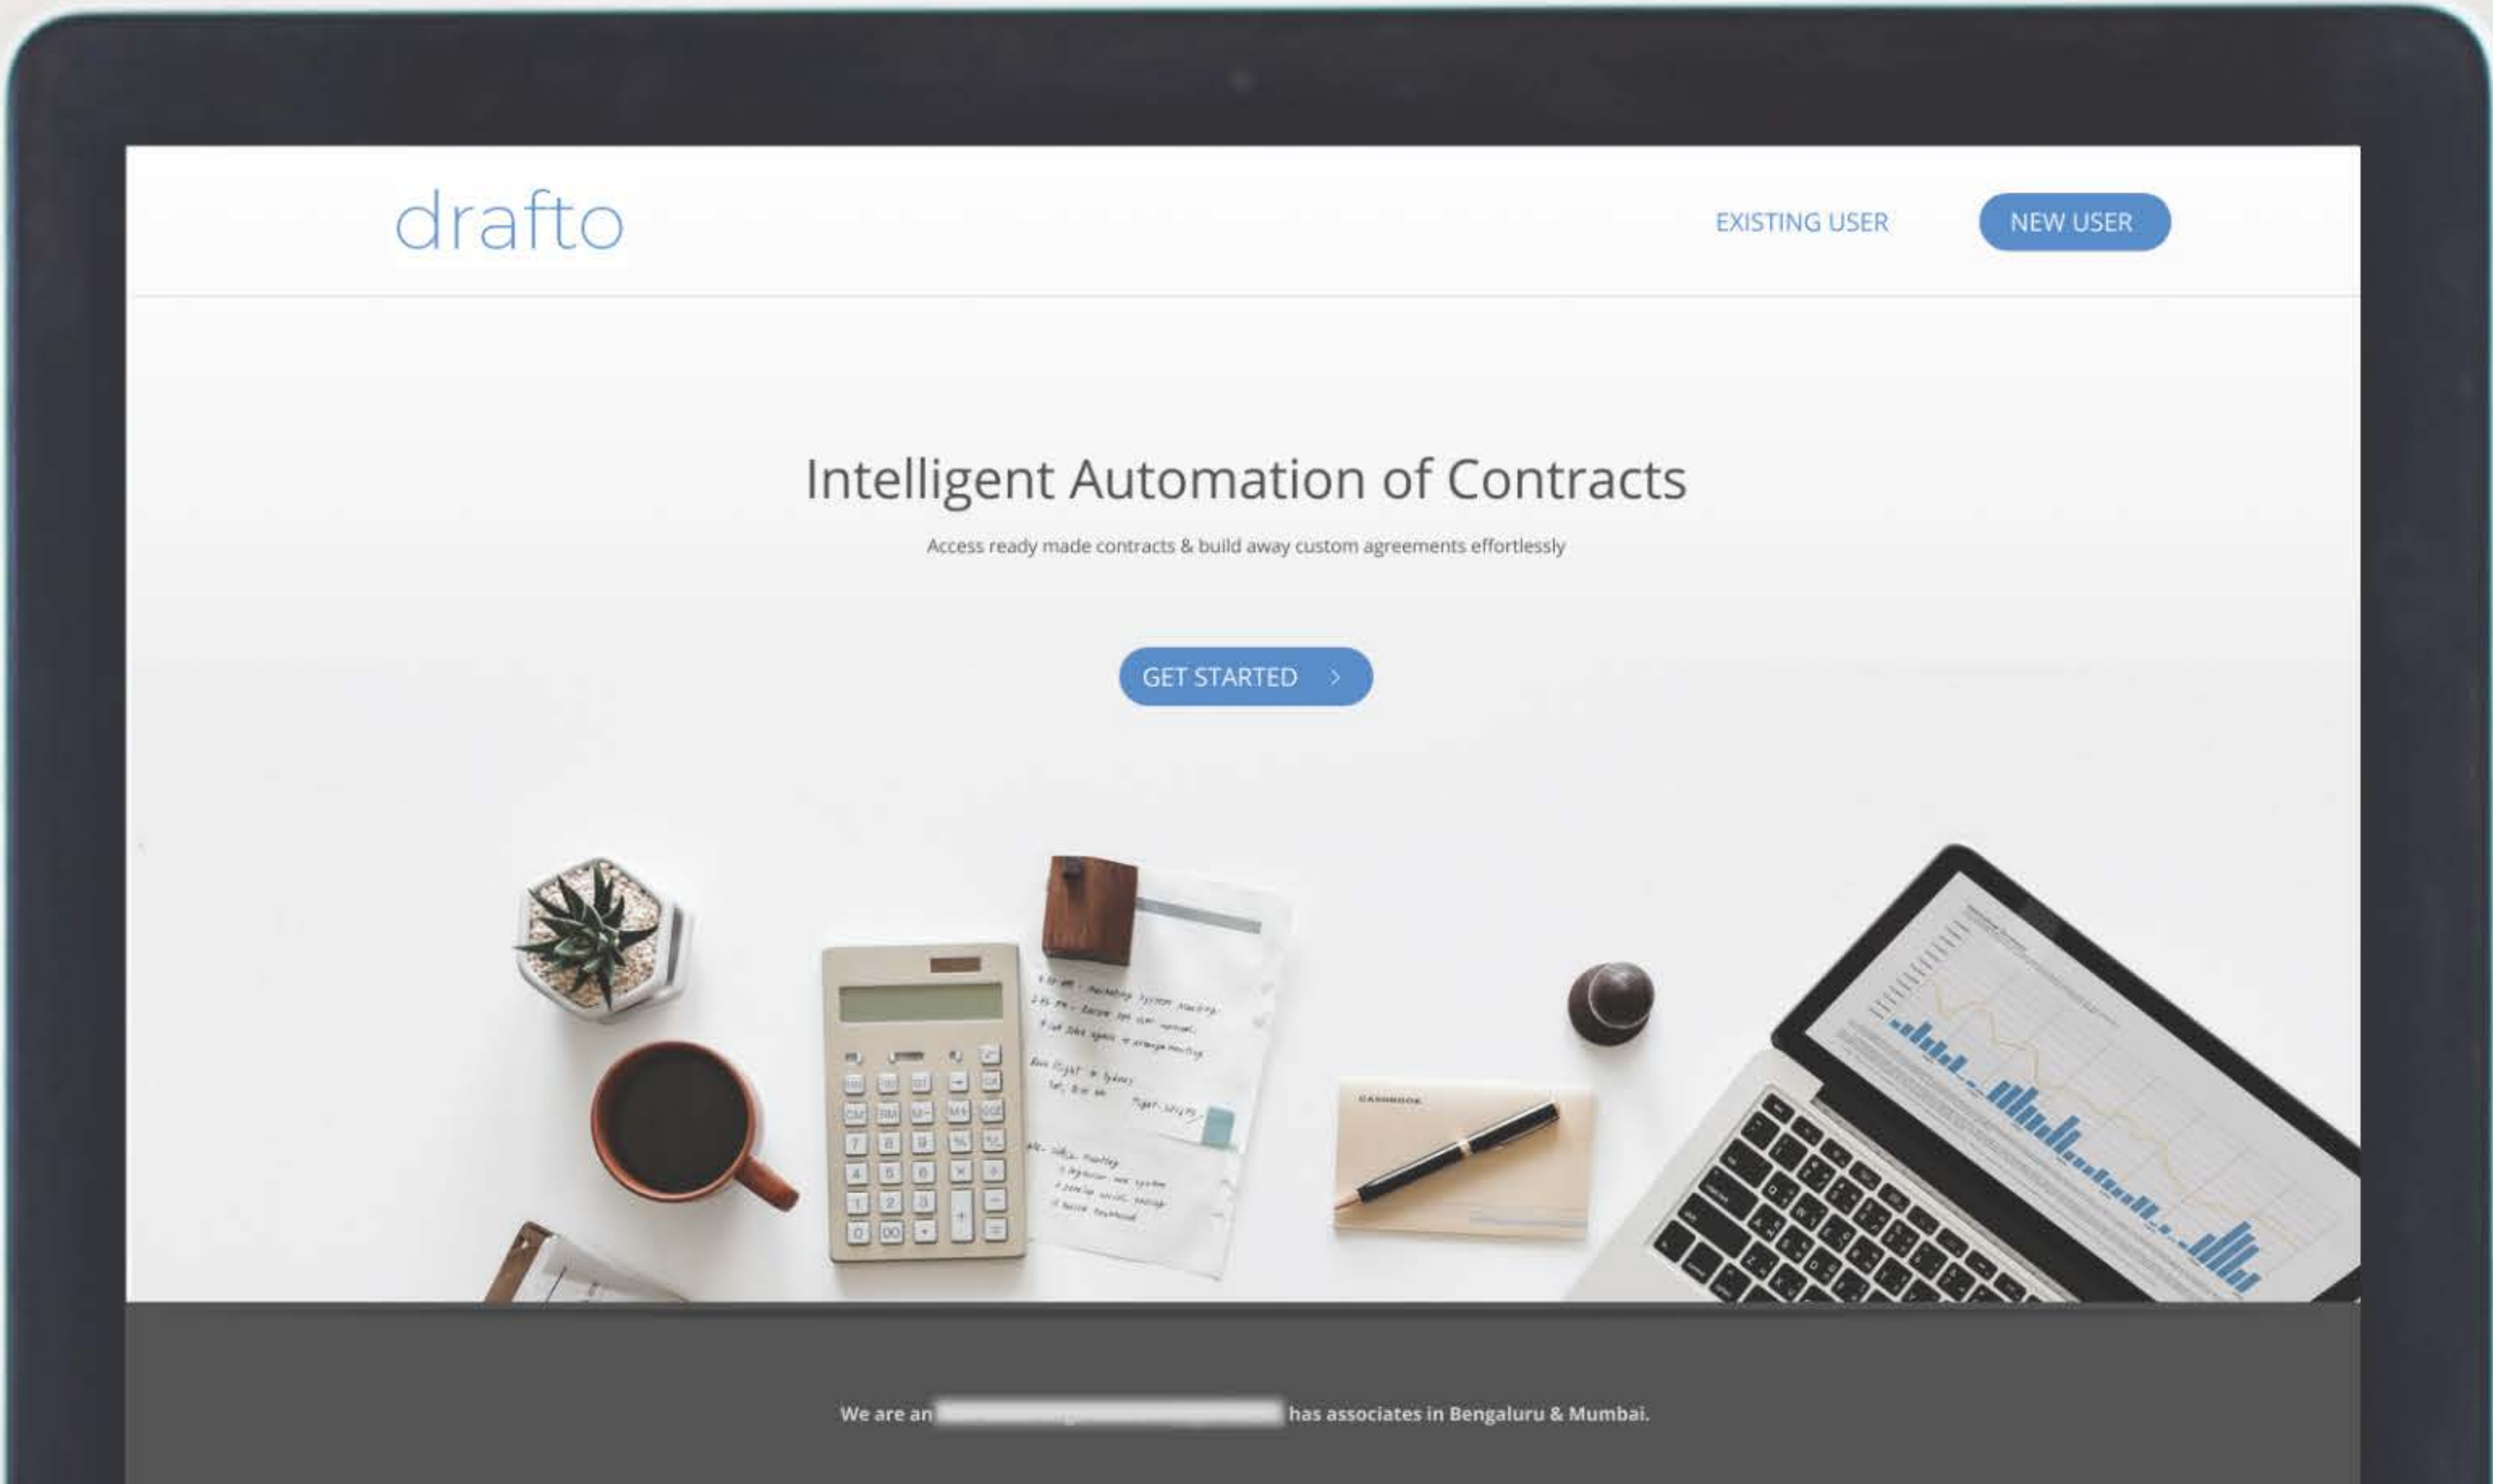

A tool where you can draft your contracts objectively and fill in as little information as possible and let the system fetch, pre-fill and automate your documentation work leaving you to think about the language necessary to keep you off liability and risk as much as possible.
