

Anantha
Chickanayakanahalli

Product & New
Media Designer

About Me

I am Anantha. I love working with **data, graphics and problem solving**.

I have evolved in my career from designing educational tools to web products and to now new media and extended reality experiences.

**When designing products
experiences, I believe in asking
right all the questions.**

We are dealing with more copious information streams today than we had yesterday. Getting to the key data that matters is not easy, is at the heart of interaction design and is what makes me do what I do. On a lighter note, Interaction Design is act of [reducing entropy of a system](#). I'm drawn to creating solutions that delight not just our clients but us as product developers and designers.

I am passionate about language, context and artificial general intelligence. When I am not punching away keys or moving things with my mouse, I can be found listening to audio books or binging on tv shows and anime.

Curriculum Vitae

EXPERIENCE (9+ Years)

-  **OCAD University** (2022-Present)
Research Intern at Visual Analytics Lab
-  **Honeywell** (2019-2021)
Advanced User Experience Designer
-  **Mindtree** (2014-2019)
Design Consultant
(Awarded Outstanding Performer of the year 2017-2018)
-  **Ideus Concepts** (2013-2014)
UX Designer
-  **Symantec** (2011-2012)
UI Designer

EDUCATION

-  **Ontario College of Art & Design University, Canada**
(2021-2023)
Master of Design in Digital Futures
-  **Indian Institute of Technology Bombay, India**
(2009-2011)
Master of Design in Interaction Design
-  **Bangalore University, India** (2003-2009)
Bachelor of Architecture

LANGUAGES

English, Hindi, Kannada

SKILLS

Interaction Design, Visual Design, Data Visualization, Sketching, Storyboarding, Card Sorting, Information Architecture, UX Strategy, Contextual Inquiry, Responsive Web Design, Prototyping, Persona mapping, Wireframing, User Journey Mapping, Authoring Style Guides, XR Design

TOOLS

Adobe Creative Suite (Photoshop, Illustrator, Primiere, XD, Aero), Sketch, Figma, Axure, Zeplin, P5JS, Arduino, HTML/CSS/JS (beginner), Unity, Blender

PERSONALITY

Self-organized, result-oriented, fast learner

UX Design Projects

New Media Design Projects

PROJECT 1

- 
- Airport Gates Operating System**
- UX Research | Interaction Design | Visual Design | Prototyping | User Testing

PROJECT 2

- 
- IAQ Monitoring**
- UX Design | Visual Design | Prototyping

PROJECT 3

- 
- Contract Management System**
- UX Research | Interaction Design | Visual Design | Prototyping

PROJECT 4

- 
- Mixed Reality Folktales**
- AR Installation | 3d modelling | Storyboarding

PROJECT 5

- 
- Type Of The Day**
- Game Design | 3d Modelling | Storyboarding

PROJECT 6

- 
- Step-In-Step-Out**
- Tangible Installation | Concept | Projection Mapping

User Experience

Gates Operating System

Similar to what happens at a hotel lobby - someone is waiting (some are done waiting), allocating new rooms, making a list of available rooms, taking down requirements, first best option, next best option, customer is not checking out on time (overflowing)

Challenges

Making sure a controller can look at multiple gates and get into nittigrities of each gate, see which flights are upcoming for it, whilst being able to multitask with assigning actions to ground safety equipment staff, pilots, bridge controllers without being overwhelmed.

Problems at Gates

Gates Operating System

Stand Info

Journey Map

Secondary Personas

Ground crew or Ground Safety Equipment staff, Marshallers: Airport personnel responsible for directing aircraft as they move around the airport on the ground, including guiding them from the taxiway to the gate.

Aircraft docking does not happen manually in big airports nowadays but with Automatic Visual Docking Guidance Systems (A-VDGS).

Gates Operating System

Apron Controllers

They are the primary persona for this tool and they manage the sequence of startups and pushbacks and route the aircraft to an agreed position adjacent to or on the taxiway. They route the aircrafts to their designated parking stand. Some airports require apron control because of the layout, where the Tower controllers cannot clearly see the Apron situation.

Xd Case Study

TOOLS USED

Enabling smooth turnaround of flights at airports operated by Apron Controller who manages traffic in the gates/aprons, the Gates Operating System provides alerts and controls to mitigate and tactically solve problems.

Human Machine Interface

IAQ Monitoring

Human Machine Interface

The screenshot displays a mobile application interface for business performance management. The top navigation bar includes tabs for Notification, Messages, Schedules, Air Quality, Device Performance, and Orders. The 'Notification' tab is active, showing a list of six recent notifications, each with a small circular icon, a ticket ID, a client name, and the text 'Lamp Replacement Order Delay'. To the right of the notifications are two donut charts: one for 'Share of Business per vertical' and another for 'Share of Business per region', both with multiple colored segments and labels for Type A through Type H.

Responsive Indoor Air Quality (IAQ) monitoring **master dashboard** that gives different levels of information about accounts and sites to the super admin.

IAQ Monitoring

The screenshot displays a dark-themed facility administration dashboard for IAQ monitoring. At the top right, there are two tabs: "Device Status" and "Air Quality Status". The main content area is divided into several sections:

- Buildings:** A sidebar on the left lists "Buildings" (All, Building 1, Building 2, Building 3, Building 4), "Customer/Site", "3 campuses", and "4 Buildings New Construction".
- Device Status:** A table showing device details for four units:

Device ID	Type	Location	Runtime	Alert	Status	Power	Fan Speed	Schedule
Device U124232 PORTU03	R1002	R1002 Type Classroom	1345	!	●	Toggle	Bar chart	Icon
Device U124232 PROU02	R1002	R1002 Type Classroom	2345	●	●	Toggle	Bar chart	Icon
Device U124232 IDI01	R1002	R1002 Type Classroom	2343	!	●	Toggle	Bar chart	Icon
Device U124232 BOSS01	R1002	R1002 Type Classroom	2353	!	●	Toggle	Bar chart	Icon
- Air Quality Status:** A summary section for Building 1 showing indoor and outdoor air quality metrics:

Indoor Air Quality	Outdoor Air Quality
AQ Index	AQ Index
Temperature	Temperature
Humidity	Humidity

Below this, specific indoor air quality data is listed:

Indoor Air Quality	Oxidants	CO	TVOC	PM2.5	PM10
73 ppb	1250 ppm	900 $\mu\text{gm}/\text{m}^3$	80 $\mu\text{gm}/\text{m}^3$	96 $\mu\text{gm}/\text{m}^3$	

Icons at the bottom indicate "High CO2: Increased occupancy" and "High PM2.5: Check air filters".

Responsive Indoor Air Quality (IAQ) monitoring **facility admin dashboard** that gives different levels of information about the site along with the equipment statuses and allowing to follow up on any tickets raised by them.

Tools used

Contracts Mgmt. System

A tool for drafting your contracts objectively and filling in as little information as possible. Let the system fetch, pre-fill and automate your documentation work leaving you to think about the language necessary to keep you off liability and risk as much as possible.

The screenshot shows the homepage of the drafto website. At the top, there are two buttons: "EXISTING USER" and "NEW USER". Below the buttons, the word "drafto" is displayed in a large, lowercase, sans-serif font. Underneath, the text "Intelligent Automation of Contracts" is centered. A subtext below it reads "Access ready made contracts & build away custom agreements effortlessly". A "GET STARTED" button with a right-pointing arrow is located at the bottom of this section. The background of the page features a photograph of a clean, organized desk with a laptop displaying a chart, a calculator, a small potted plant, a coffee cup, and some papers with handwritten notes.

We are an has associates in Bengaluru & Mumbai.

Tools used

Contracts Mgmt. System

-  edit
-  componentize
-  share
-  get feedback for an excerpt
-  automate and prefill content into an excerpt
-  move things around
-  work with versions (this save key conversations and proposed changes/modifications lost in emails)
-  search and replace names/objects/keywords
-  hide/show/blur where required
-  work with content smartly, highlight the consequences of content (helps save time and money for client and owner)
-  identify crucial keywords that can make or break risk present in this
-  I may not have time and patience in going over the full matter over and over again which is present in an excerpt (highlight what's changed)

The tool enables you to **create and format documents** giving closest representation of a situation or reality that can be agreed upon by more than one person. At the core, it is a word processor that helps you string words together in an effective way.

first floor
the "LEASED PREMISES" and the LESSEE has
and conditions:
NOW THIS DEED WITNESSETH AS UNDER:
1. That the lease is for a period of 12 Months commencing from 2
2018 and ending on 24 March 2019
2. That the LESSEE shall pay to the LESSOR a monthly rent of 45000

Mixed Reality Folktales

youtu.be/MhQEYtDM5Wo

<https://adobe Aero.app.link/uXCAGwZfDub>

Tools used

An AR project to make the viewer a part of the story by creating triggers for different acts of the storyline; based on their interaction, the story progresses.

Mixed Reality Folktales

Once there was a thirsty crow who was looking for water

There was a little water in it but it was at the bottom of the pot

Saw some small pebbles

Soon, water came up

Moral of this story is that every problem has a solution provided we look to find it

445 POINTS

Type of the Day

Team

Xuyan Ding (Kevin), Le Shen, Javan Graham, Jia Zhao, Shannen Guntoro, YunTing He, Anantha Chickanayakanahalli

Playtesting

University of Toronto Game Development Club
& Ubisoft

- <https://youtu.be/enNRQzSwlbM>
- <https://kevinding.itch.io/type-to-win>

Tools used

We developed a single player **typing adventure game** called Type of the day which is a typing game on adrenaline. The name started with was 'Type-to-win' but became 'Type of the day' because the character was going to experience an abnormal normal day.
