

Anantha
Chickanayakanahalli

Product & New
Media Designer

I am Anantha. I love working with **data, graphics and problem solving**.

I have evolved in my career from designing educational tools to web products and to now new media and extended reality experiences.

When designing ~~products~~
experiences, I believe in asking
~~right~~ all the questions.

We are dealing with more copious information streams today than we had yesterday. Getting to the key data that matters is not easy, is at the heart of interaction design and is what makes me do what I do. I'm drawn to creating solutions that delight not just our clients but us as product developers and designers.

I am passionate about language, context and artificial general intelligence. When I am not punching away keys or moving things with my mouse, I can be found listening to audio books or binging tv shows and anime. I am based out of Toronto and I had become quite the beach hopper before Covid.

Anantha
Chickanayakanahalli

EXPERIENCE (9+ Years)

- **OCAD University** (2022-Present)
Research Intern at Visual Analytics Lab
- **Honeywell** (2019-2021)
Advanced User Experience Designer
- **Mindtree** (2014-2019)
Design Consultant
(Awarded Outstanding Performer of the year 2017-2018)
- **Ideus Concepts** (2013-2014)
UX Designer
- **Symantec** (2011-2012)
UI Designer

EDUCATION

- **Ontario College of Art & Design University, Canada**
(2021-2023)
Master of Design in Digital Futures
- **Indian Institute of Technology Bombay, India**
(2009-2011)
Master of Design in Interaction Design
- **Bangalore University, India** (2003-2009)
Bachelor of Architecture

LANGUAGES

English, Hindi, Kannada

SKILLS

Sketching, Storyboarding, Card Sorting, Information Architecture, UX Strategy, Contextual Inquiry, Responsive Web Design, Prototyping, Persona mapping, Wireframing, User Journey Mapping, Authoring Style Guides, XR Design

TOOLS

Adobe Creative Suite (Photoshop, Illustrator, Premiere, XD, Aero), Sketch, Figma, Axure, Zeplin, P5JS, Arduino, HTML/CSS/JS (beginner), Unity, Blender

PERSONALITY

Self-organized, result-oriented, fast learner

CONTENTS

PROJECT 1

-  **Airport Gates Operating System** - UX Research | Interaction Design | Visual Design | Prototyping | User Testing

PROJECT 2

-  **IAQ Monitoring** - UX Design | Visual Design | Prototyping

PROJECT 3

-  **Contract Management System** - UX Research | Interaction Design | Visual Design | Prototyping

PROJECT 4

-  **Mixed Reality Folktales** - AR Installation | 3d modelling | Storyboarding

PROJECT 5

-  **Type Of The Day** - Game Design | 3d Modelling | Storyboarding

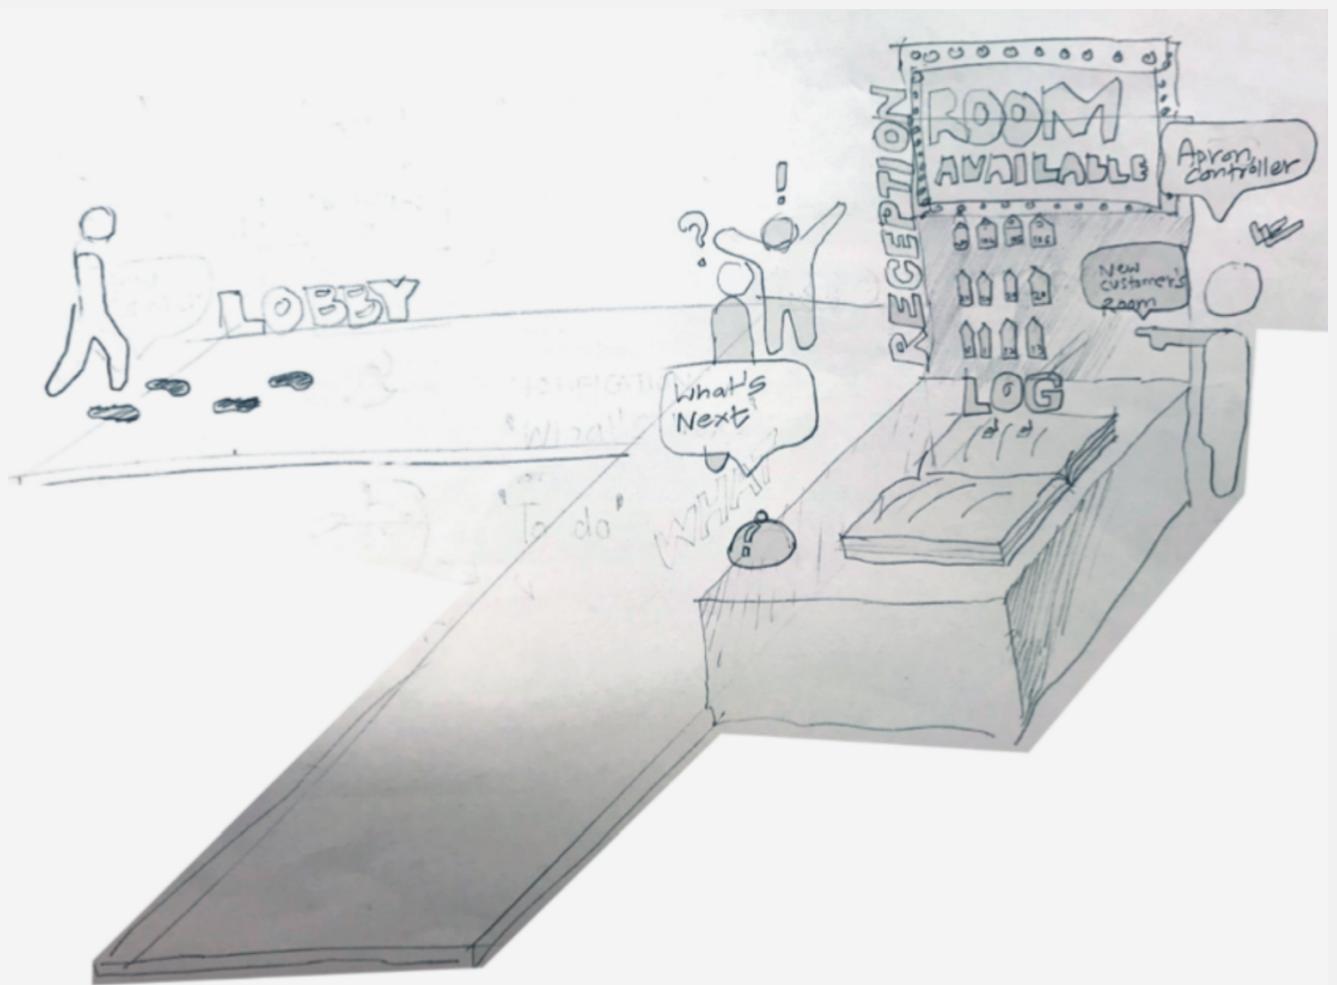

PROJECT 6

-  **Step-In-Step-Out** - Tangible Installation | Concept | Projection Mapping

UX Design Projects

Design Challenge

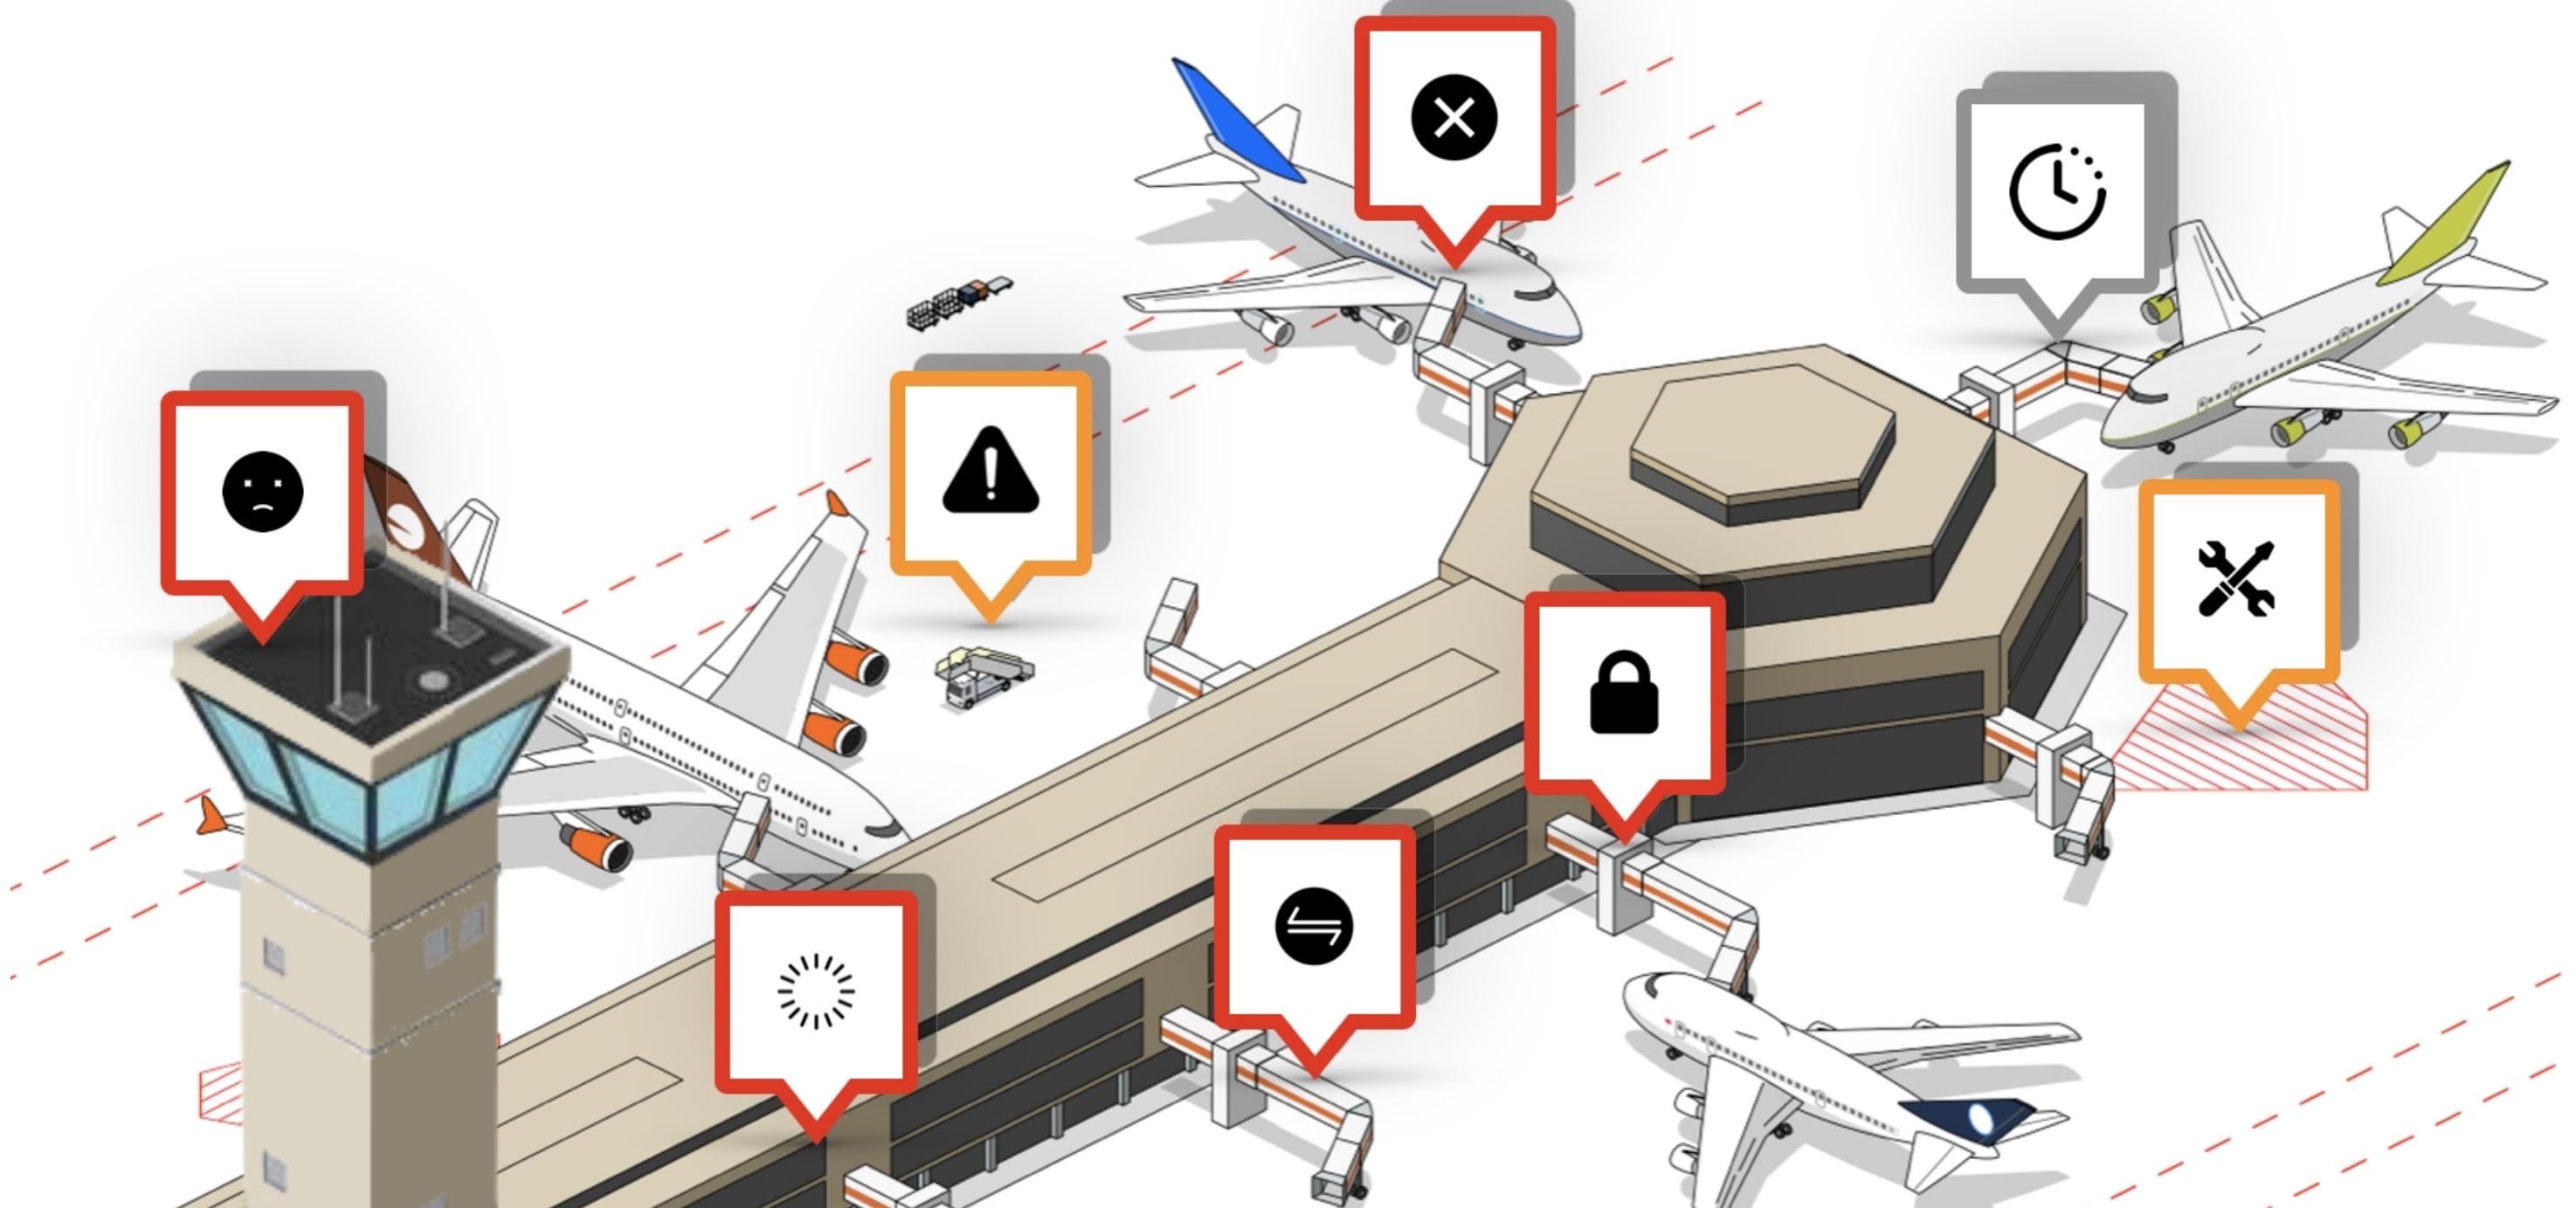

Making sure a controller can look at multiple gates and get into nittigrities of each gate, see which flights are upcoming for it, whilst being able to multitask with assigning actions to ground safety equipment staff, pilots, bridge controllers without being overwhelmed.

Similar to what happens at a hotel lobby - someone is waiting (some are done waiting), allocating new rooms, making a list of available rooms, taking down requirements, first best option, next best option, customer is not checking out on time (overflowing)

Ground crew or Ground Safety Equipment

agents: Airport personnel responsible for directing aircraft as they move around the airport on the ground, including guiding them from the taxiway to the gate.

Aircraft docking does not happen manually in big airports nowadays but with Automatic Visual Docking Guidance Systems (A-VDGS).

Enabling smooth turnaround of flights at airports operated by Apron Controller who manages traffic in the gates/aprons, the Gates Operating System provides alerts and controls to mitigate and tactically solve problems.

Apron controllers

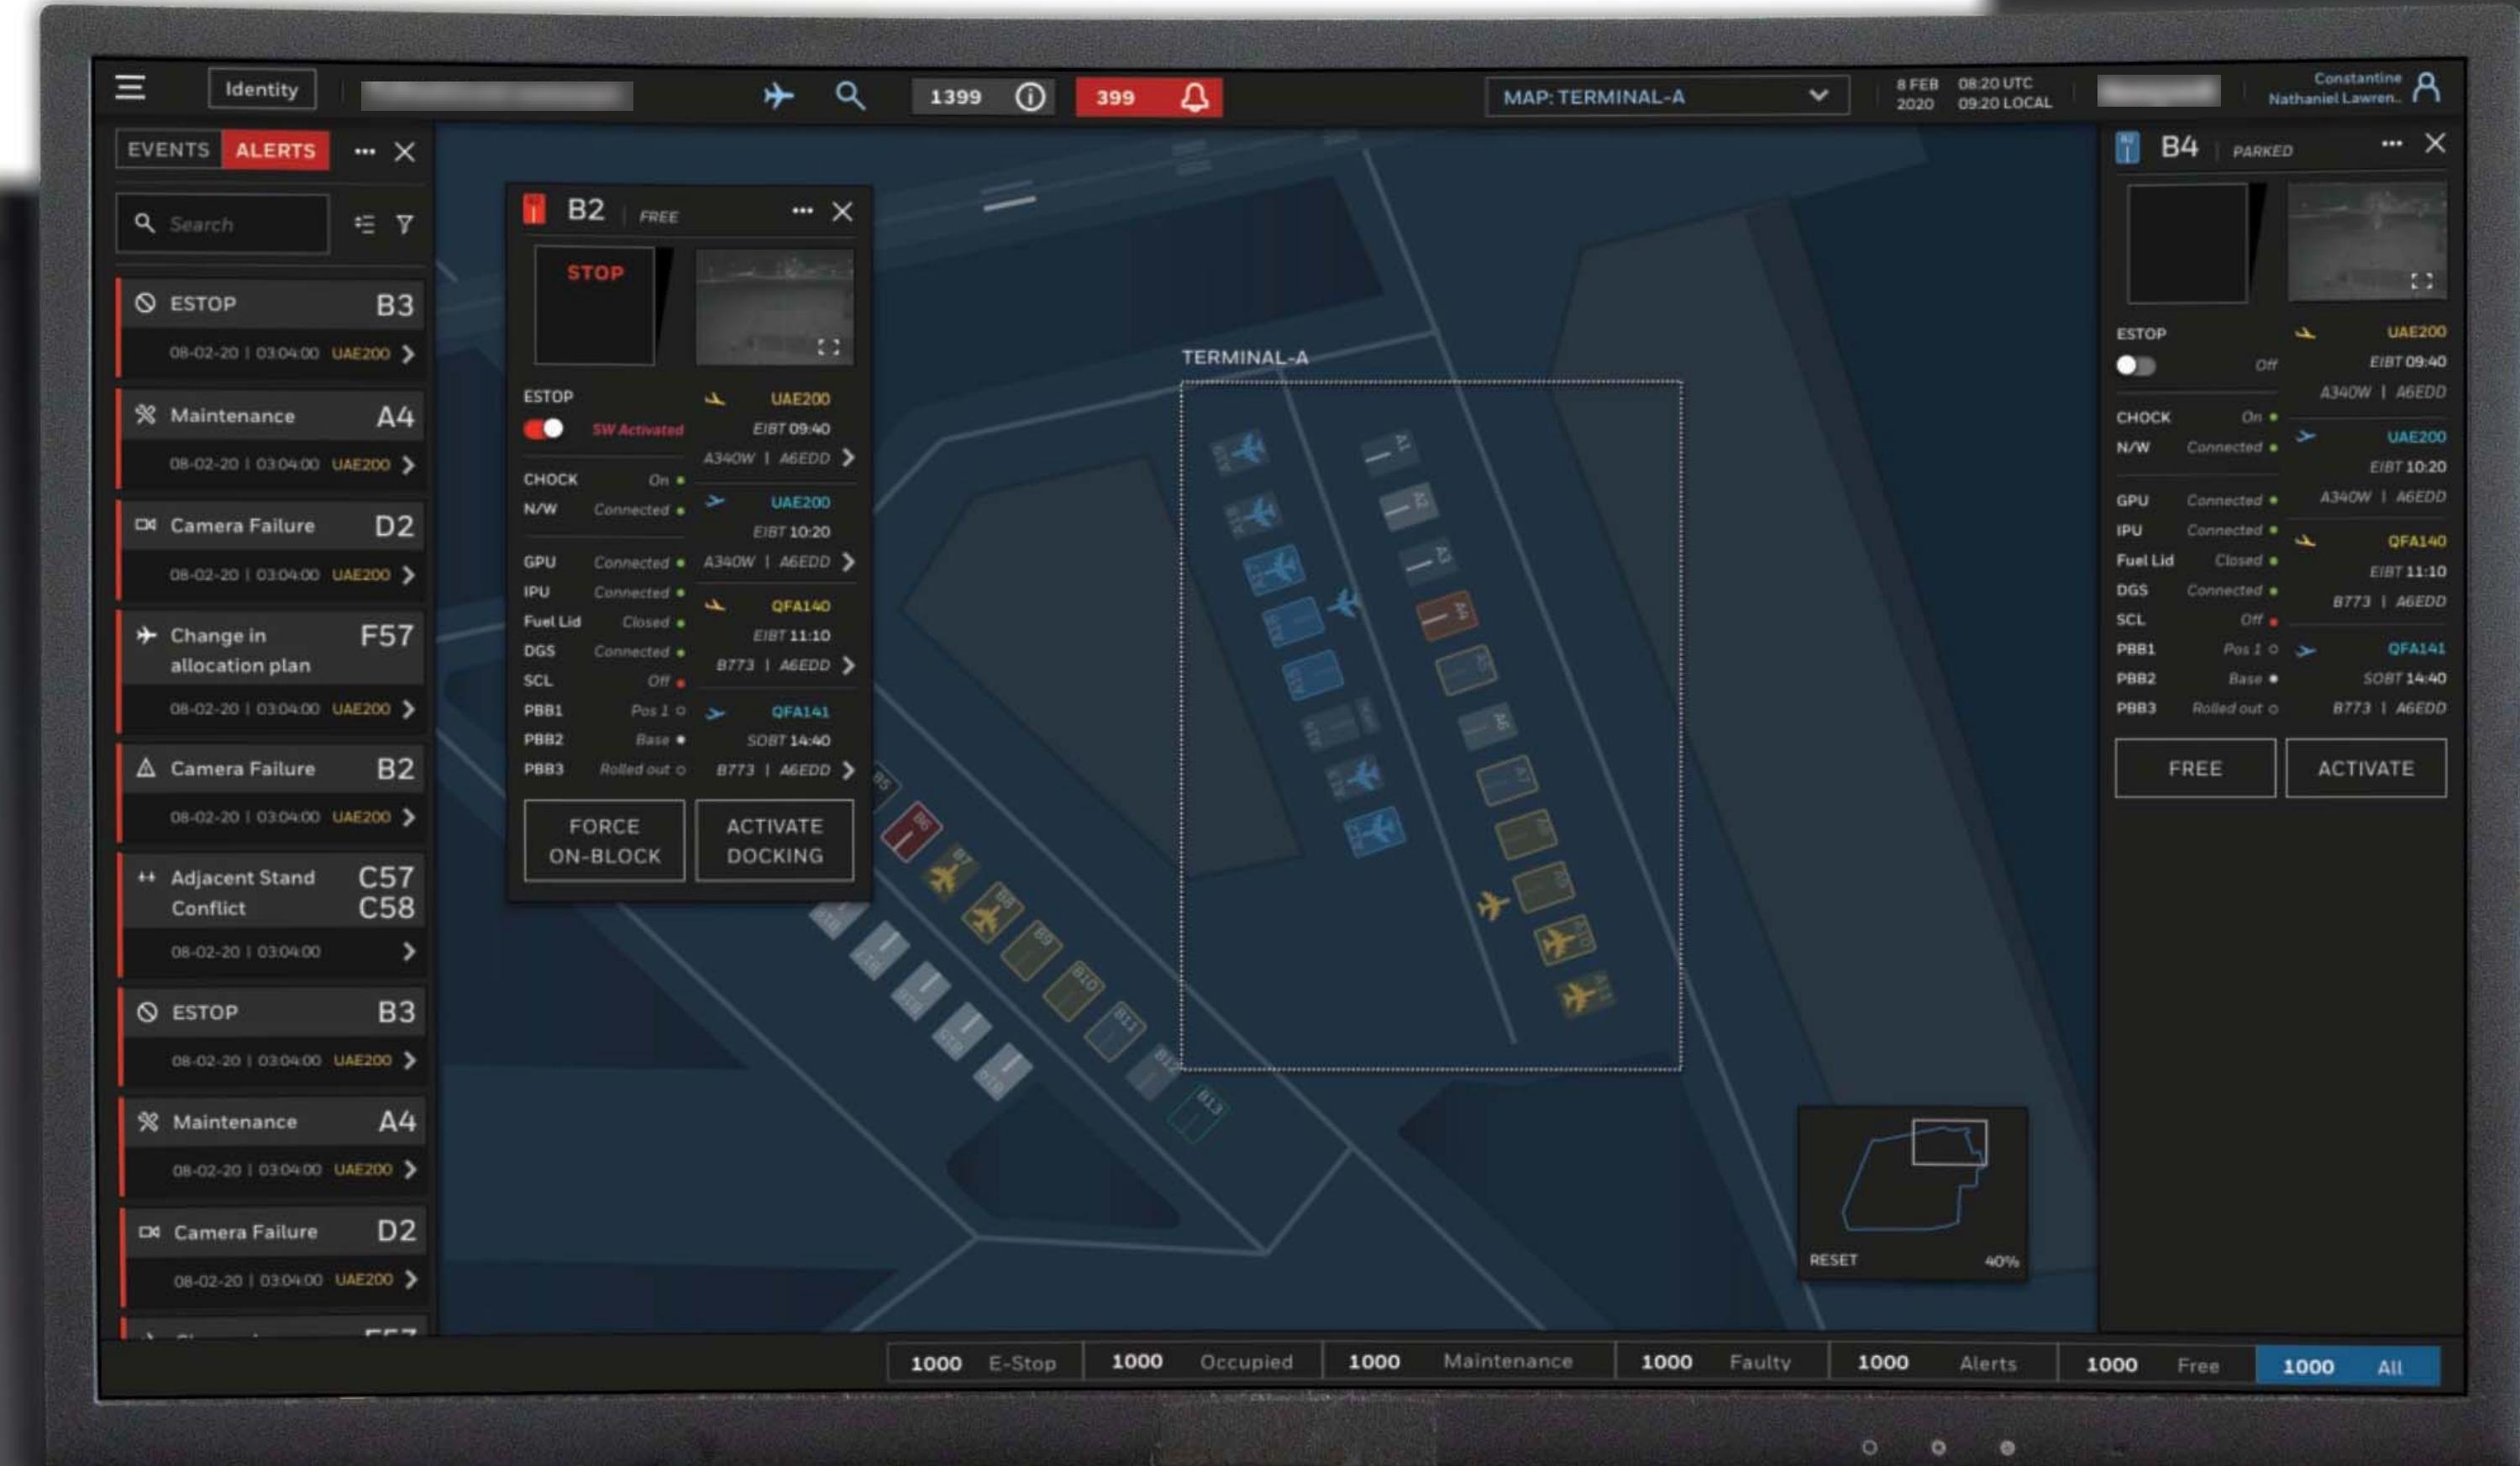

They manage the sequence of startups and pushbacks and route the aircraft to an agreed position adjacent to or on the taxiway. They route the aircrafts to their designated parking stand. Some airports require apron control because of the layout, where the Tower controllers cannot clearly see the Apron situation.

HUMAN-MACHINE INTERFACE

Responsive Indoor Air Quality (IAQ) monitoring **master dashboard** that gives different levels of information about accounts and sites to the super admin.

TOOLS USED

IAQ monitoring

Responsive Indoor Air Quality (IAQ) monitoring **master dashboard** that gives different levels of information about accounts and sites to the super admin.

The screenshot displays a mobile application interface for managing indoor air quality (IAQ) monitoring devices. The top navigation bar includes a user profile for 'Harvey Specter Admin' and tabs for 'Device Status' and 'Air Quality Status'. The main content area is divided into two sections: 'Buildings' and 'Devices Status'.

Buildings Section: This section shows a hierarchical tree of buildings and zones. The root node is 'Buildings' with 'All' selected. Below it are 'Building 1' (expanded, showing 'Zone 1', 'Zone 2', 'Zone 3', and 'Zone 4'), 'Building 2', 'Building 3', and 'Building 4'. To the left of the tree is a vertical sidebar with icons for home, customer/site, campuses, buildings, and settings.

Devices Status Section: This section contains a table with five rows of device data. Each row includes a device icon, ID, type, location, runtime, alert status, power switch, fan speed, and schedule.

Device ID	Type	Location	Runtime	Alert	Status	Power	Fan Speed	Schedule
Device U124232 PORTU03	R1002	R1002 Type Classroom	1345	!	●	<input checked="" type="checkbox"/>		<input type="button"/>
Device U124232 PROU02	R1002	R1002 Type Classroom	2345	●	●	<input checked="" type="checkbox"/>		<input type="button"/>
Device U124232 IDI01	R1002	R1002 Type Classroom	2343	!	●	<input checked="" type="checkbox"/>		<input type="button"/>
Device U124232 BOSS01	R1002	R1002 Type Classroom	2353	!	●	<input checked="" type="checkbox"/>		<input type="button"/>

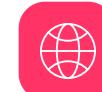

Summary Metrics: Below the table are four circular summary metrics: Indoor Air Quality (AQ Index), Temperature, Humidity, and Outdoor Air Quality (AQ Index), Temperature, Humidity, and Flu Index. At the bottom, detailed indoor air quality data is shown for Oxidants (73 ppb), CO (1250 ppm), TVOC (900 µgm/m³), PM2.5 (80 µgm/m³), and PM10 (96 µgm/m³). A note indicates 'High CO2: Increased occupancy' and 'High PM2.5: Check air filters'.

TOOLS USED

IAQ monitoring

A tool for draft your contracts objectively and filling in as little information as possible. Let the system fetch, pre-fill and automate your documentation work leaving you to think about the language necessary to keep you off liability and risk as much as possible.

(password: iac)

TOOLS USED

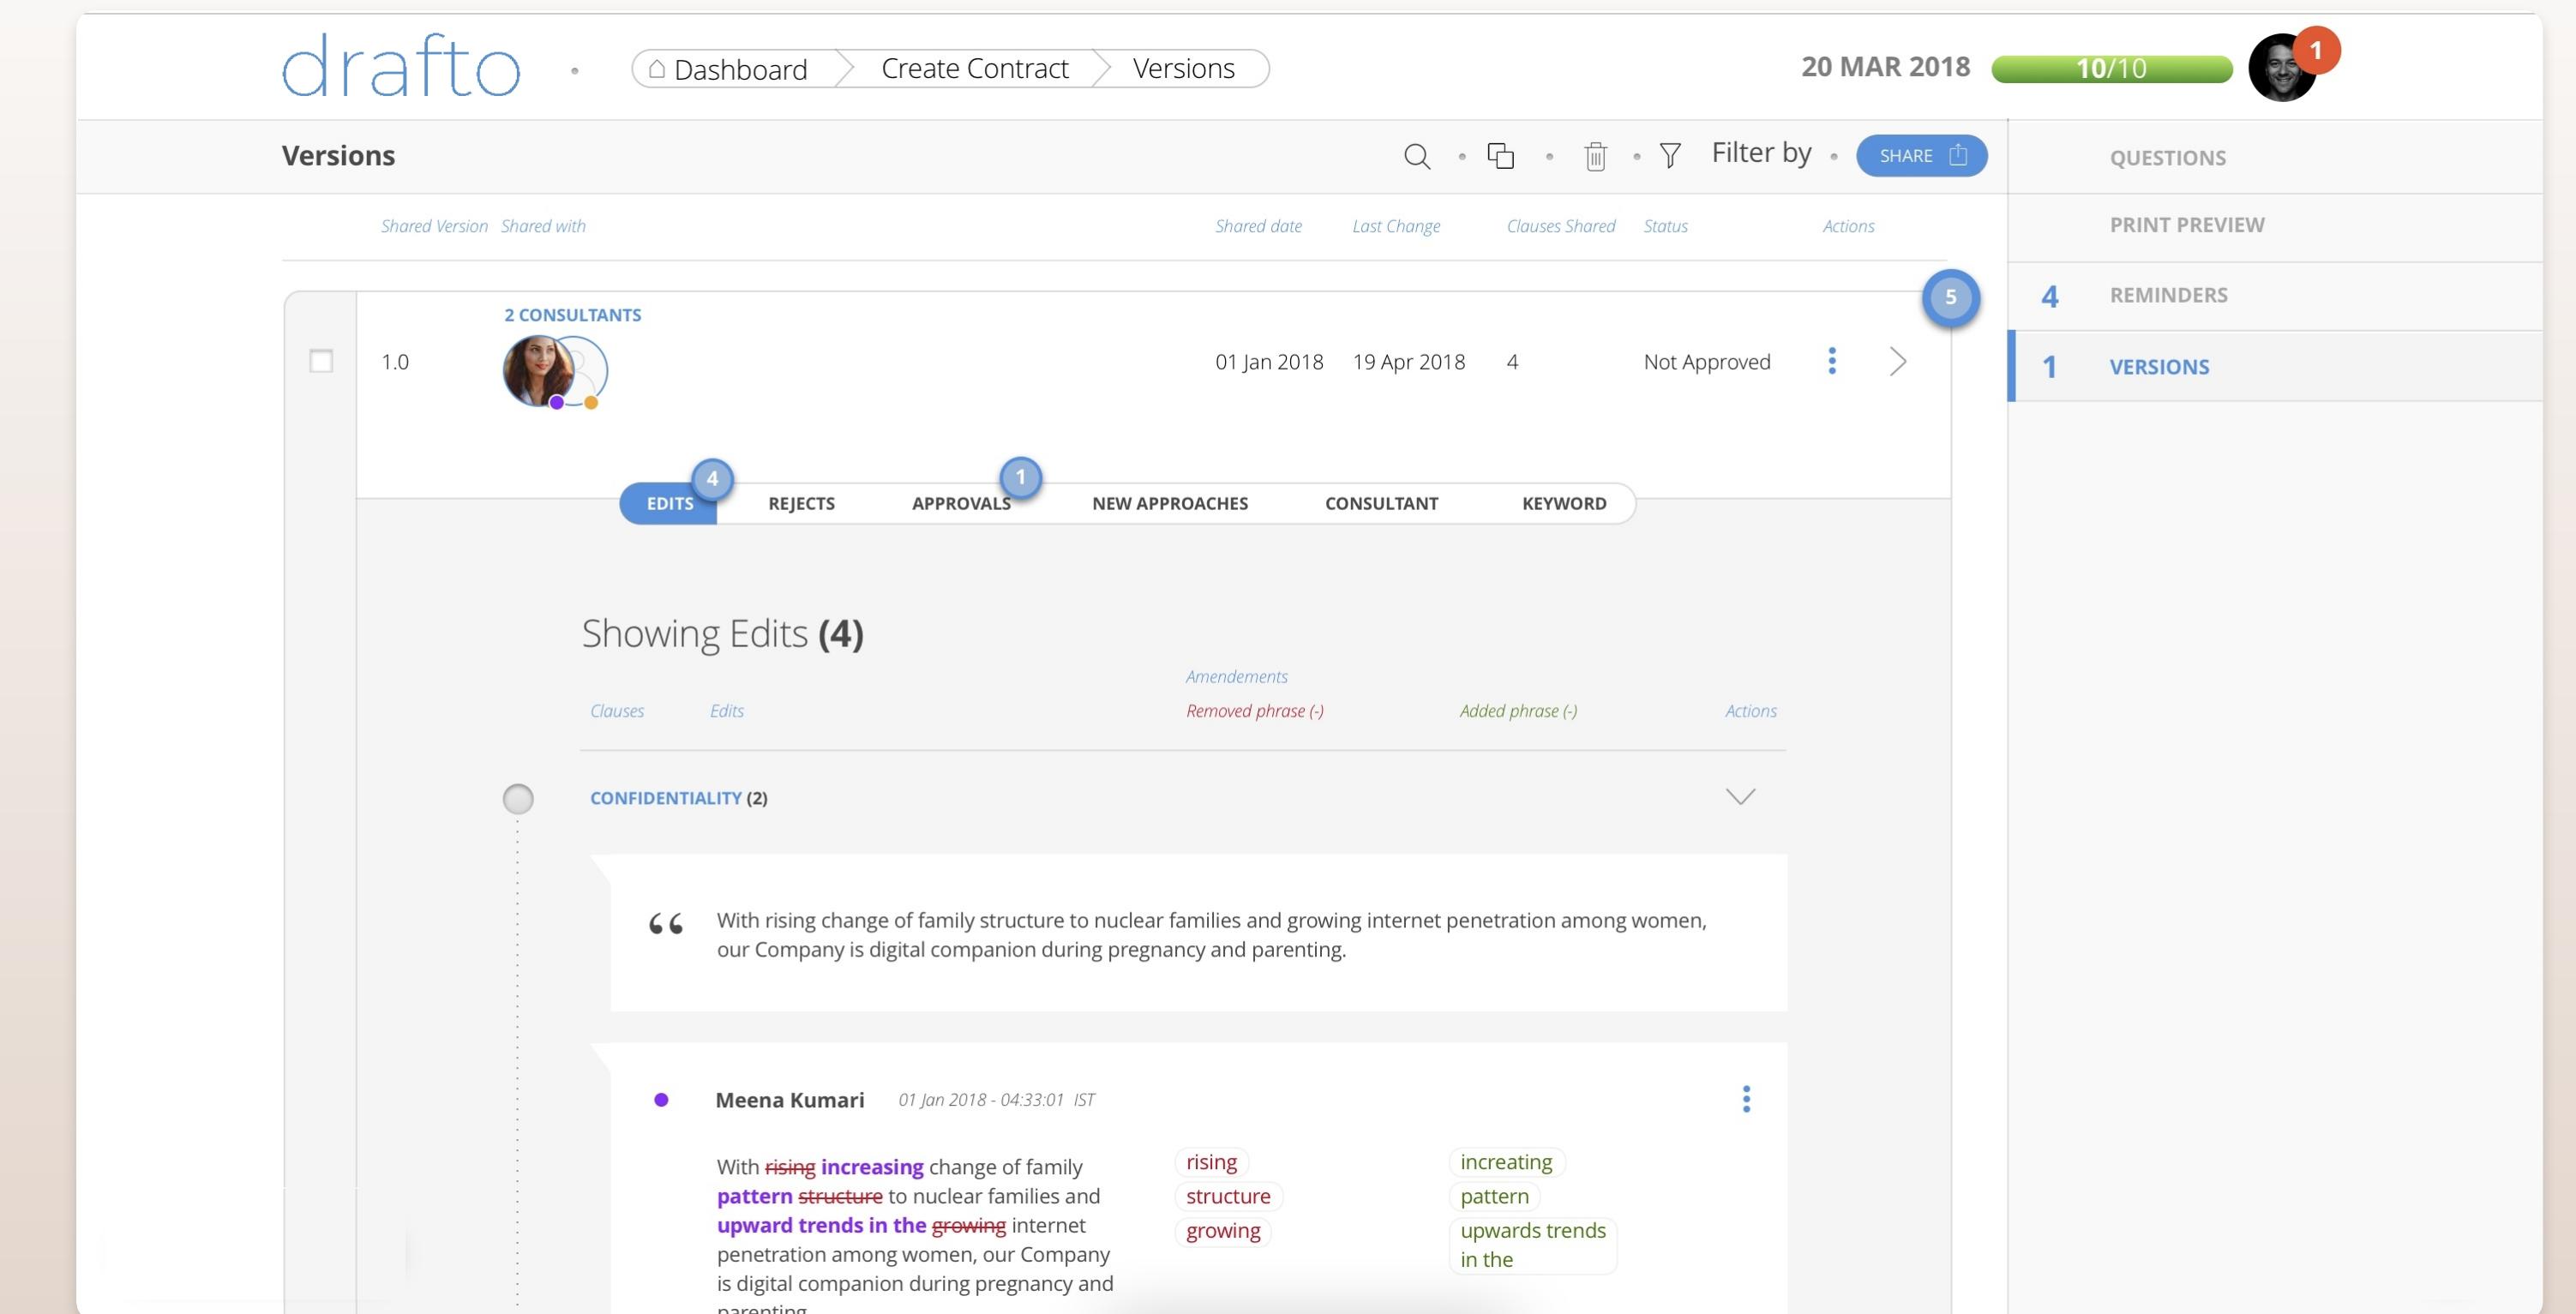

contract mgmt. system

The screenshot shows a mobile application interface for 'drafto'. At the top, there are two buttons: 'EXISTING USER' and 'NEW USER'. Below the buttons, the text 'Intelligent Automation of Contracts' is displayed, followed by the subtext 'Access ready made contracts & build away custom agreements effortlessly'. A 'GET STARTED >' button is located below this text. The background of the app screen features a photograph of a workspace with a laptop displaying a chart, a calculator, a notebook with handwritten notes, a pen, a small potted plant, and a coffee cup.

We are an has associates in Bengaluru & Mumbai.

The tool enables you to **create and format documents** giving closest representation of a situation or reality that can be agreed upon by more than one person. At the core, it is a word processor that helps you string words together in an effective way.

-  edit
-  componentize
-  share
-  get feedback for an excerpt
-  automate and prefill content into an excerpt
- move things around
-  work with versions (this save key conversations and proposed changes/modifications lost in emails)
- search and replace names/objects/keywords
-  hide/show/blur where required
-  work with content smartly, highlight the consequences of content (helps save time and money for client and owner)
-  identify crucial keywords that can make or break risk present in this
-  I may not have time and patience in going over the full matter over and over again which is present in an excerpt (highlight what's changed)

CONTEXT

An **AR project** to make the viewer a part of the story by creating triggers for different acts of the storyline; based on their interaction, the story progresses.

mixed reality folktales

STORY ACTS & INTERACTION

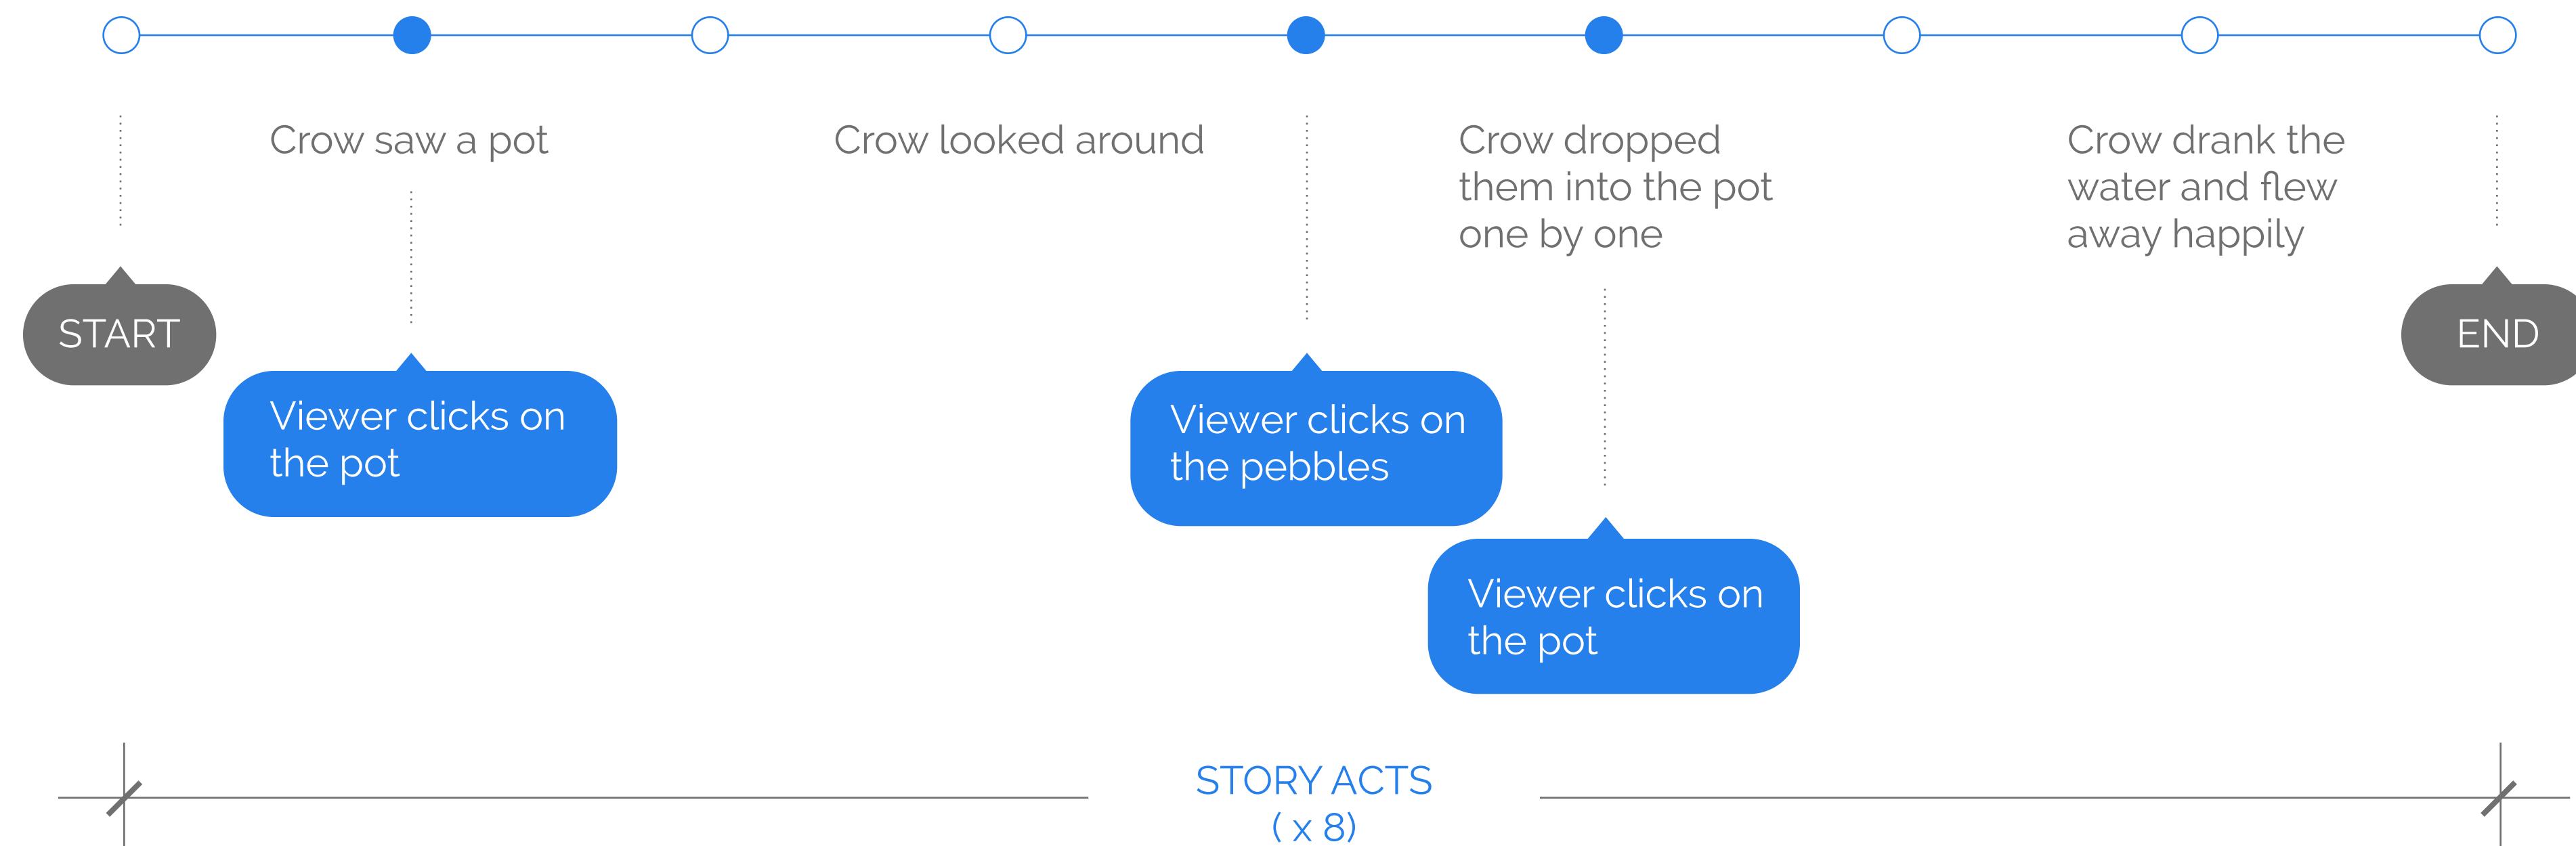

Once there was a thirsty crow who was looking for water

There was a little water in it but it was at the bottom of the pot

Saw some small pebbles

Soon, water came up

Moral of this story is that every problem has a solution provided we look to find it

445 POINTS

We developed a single player **typing adventure game** called Type of the day which is a typing game on adrenaline. The name started with was 'Type-to-win' but became 'Type of the day' because the character was going to experience an abnormal normal day.
